

Comic Strip

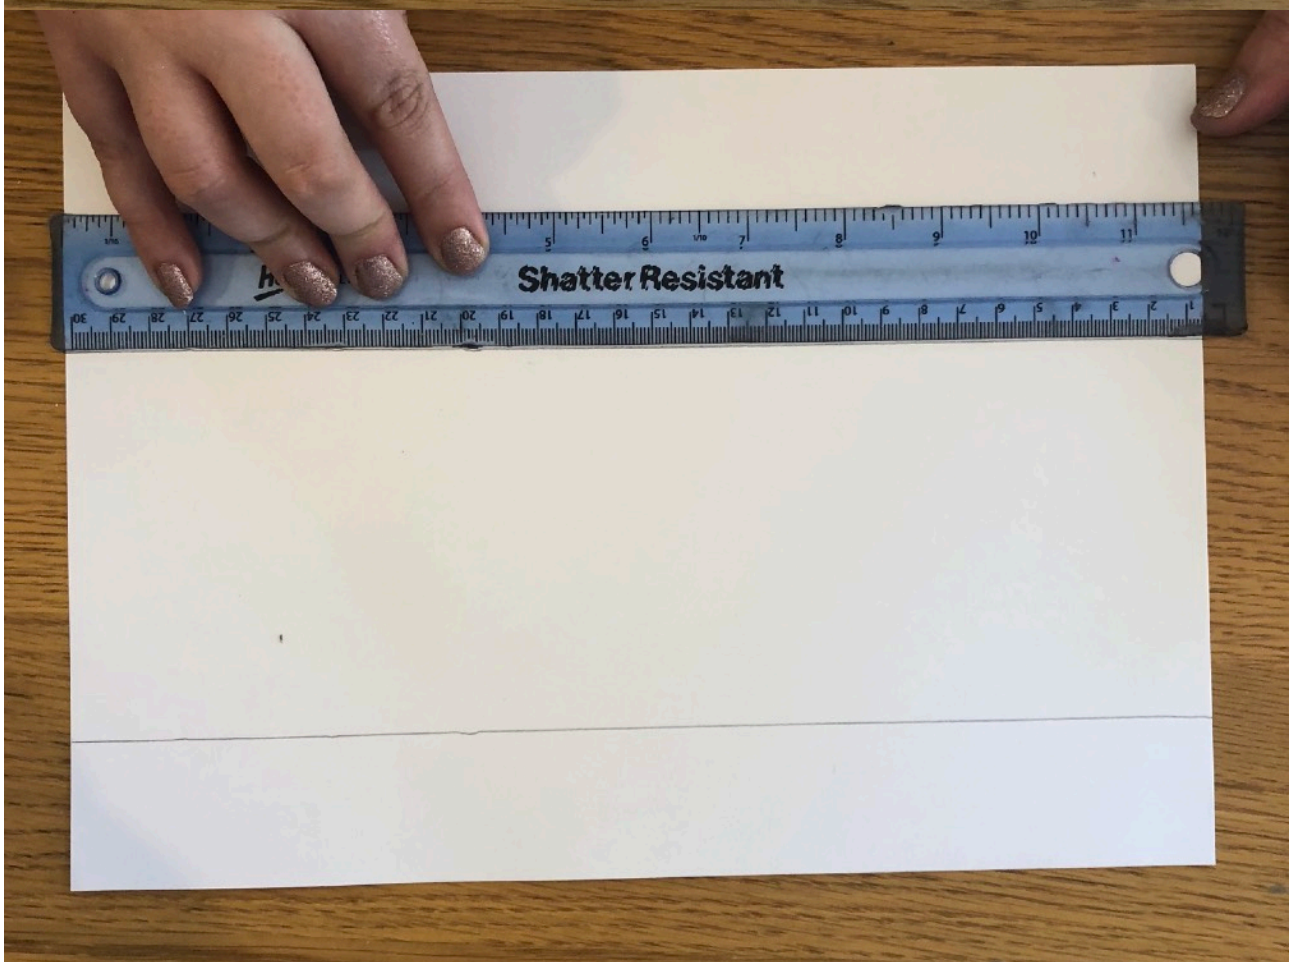

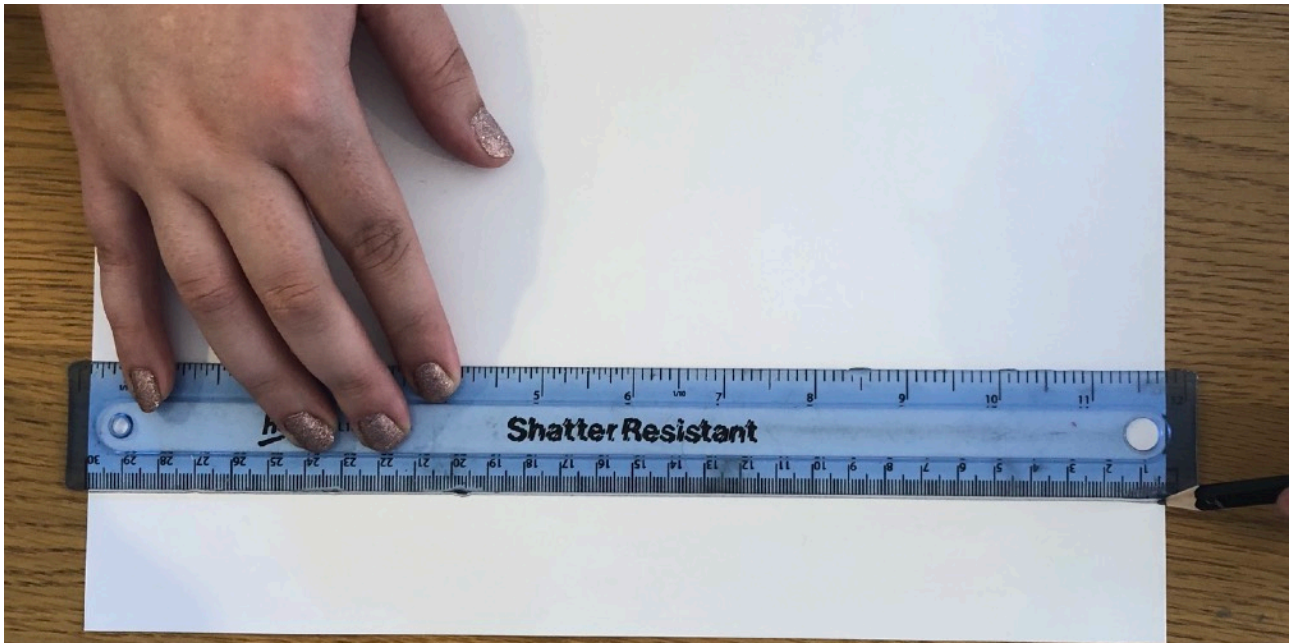

Why not create your own comic strip - you could even do a weekly one to show friends and family! Comic strips are usually a few different pictures that tell a story - they often work well with a joke. Because you have limited images to tell your story think about what is important in it!

Tools and Materials:

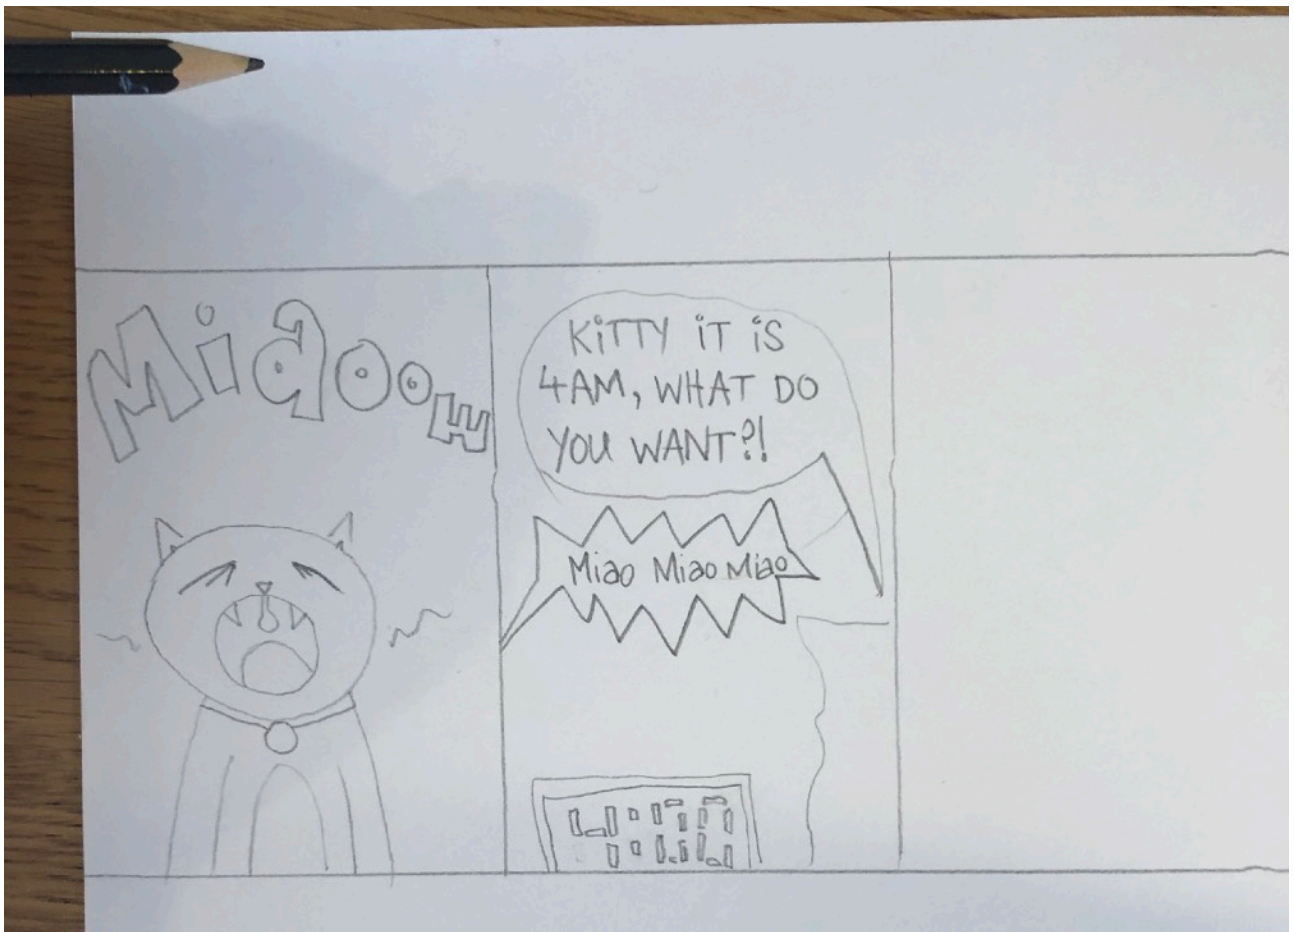

- Paper
- Pencil
- Ruler
- Felt Tip

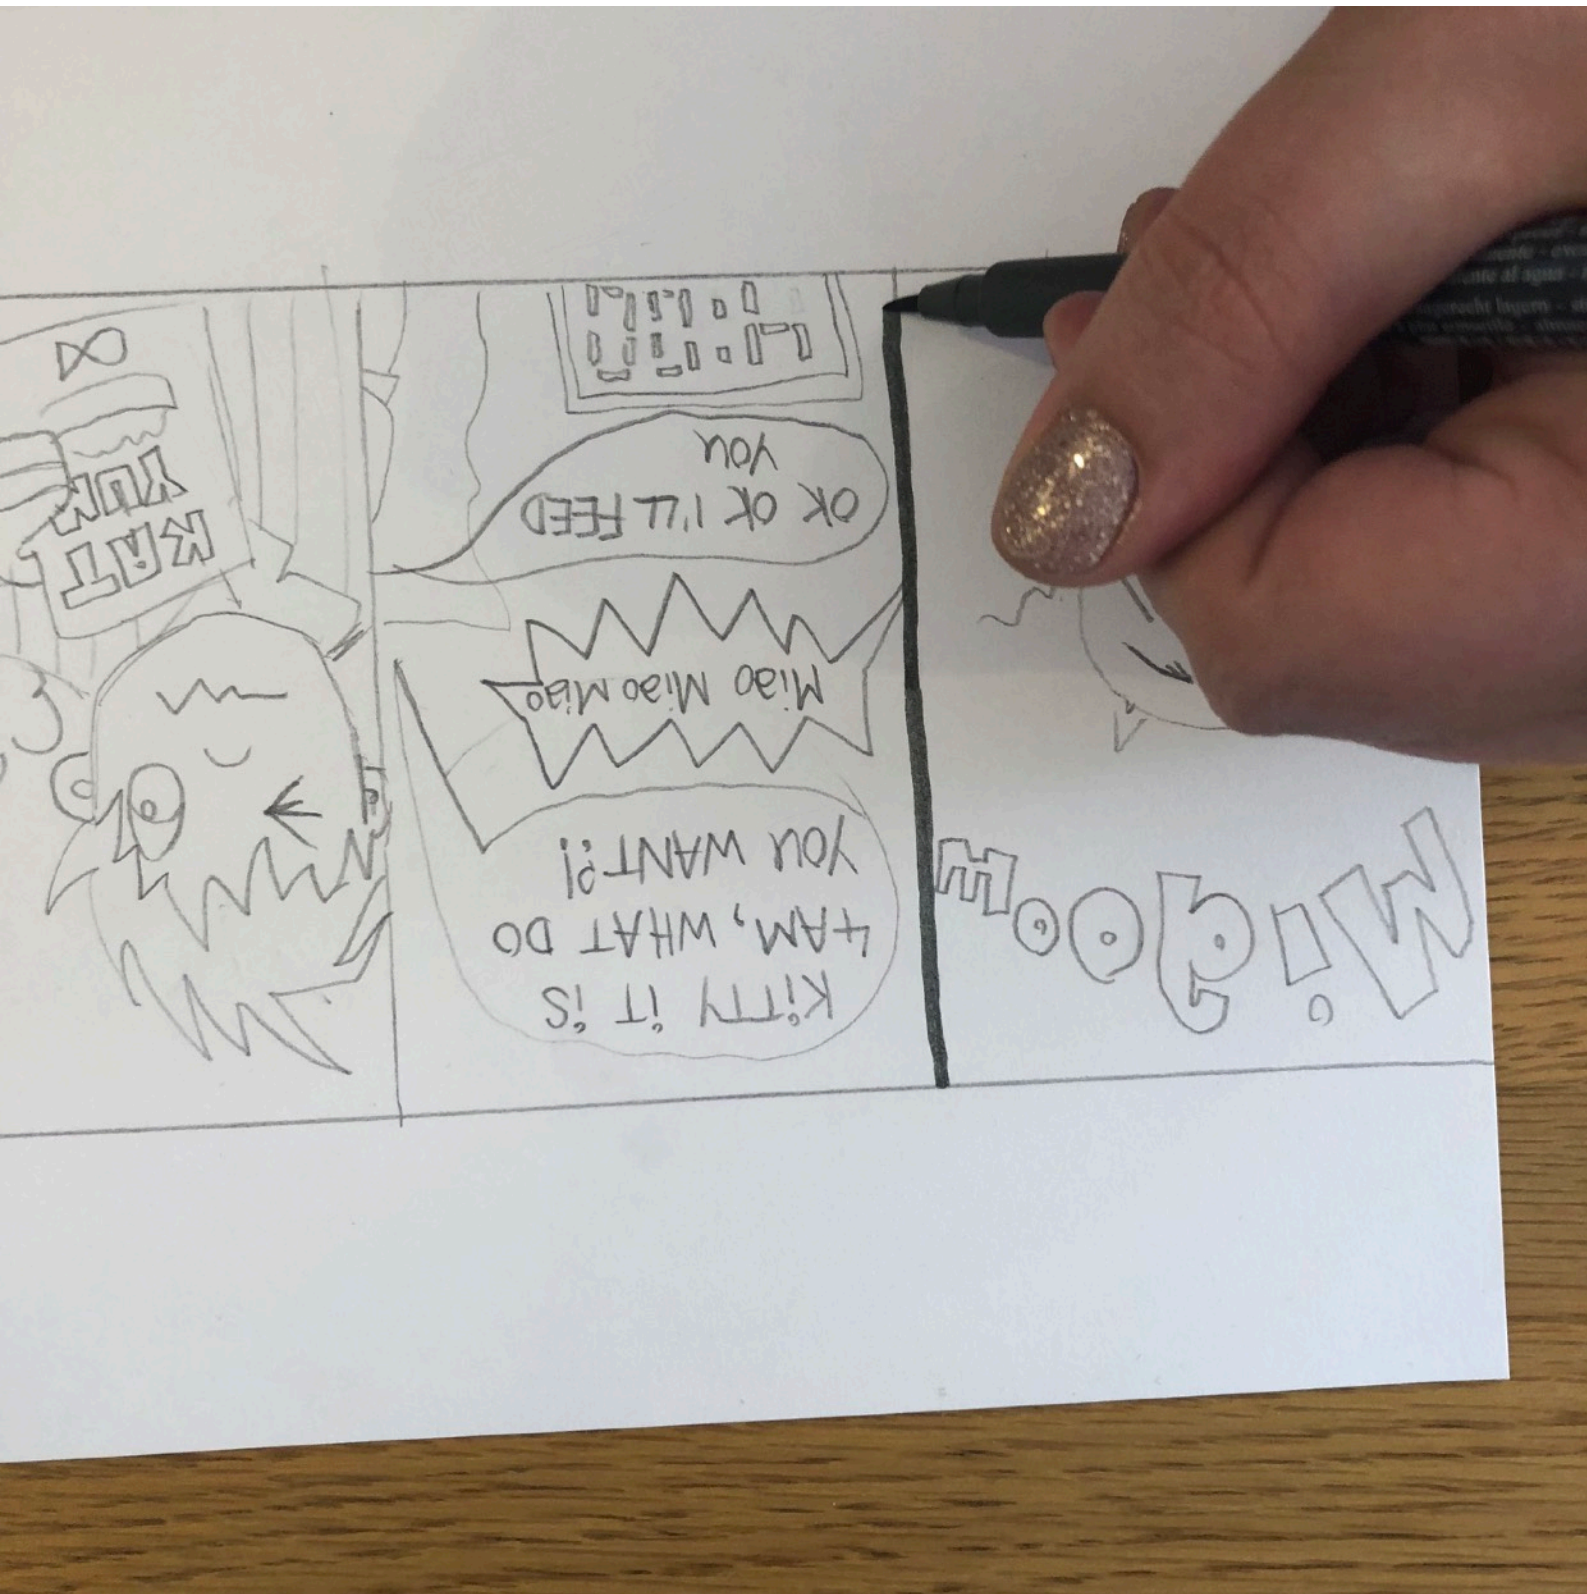

First of all what story do you want to tell? Think about what character or characters there are in it - where is it set? We chose to do ours in black and white, you can of course use colour if you wish! We thought it would be fun to do a story about a pet cat who steals the bed! First of all sketch out your strip and the different panels you want in it.

Then start sketching the elements in your story like so

Once you are happy with it you can start to outline and add the details in with the felt tip

There you have it your own "Comic Strip"
