# Horrible Haunted Houses

Celebrating Halloween why not create your own Spooky Silhouette of a Horrible Haunted House!

Tools and Materials:

- Coloured Paper (black for the top layer, a light colour for inside and another colour for background)
- Pencil
- Gluestick
- Scissors

First of all decide what the house will look like and start drawing the outline, is it a castle, what kind of roof does it have?
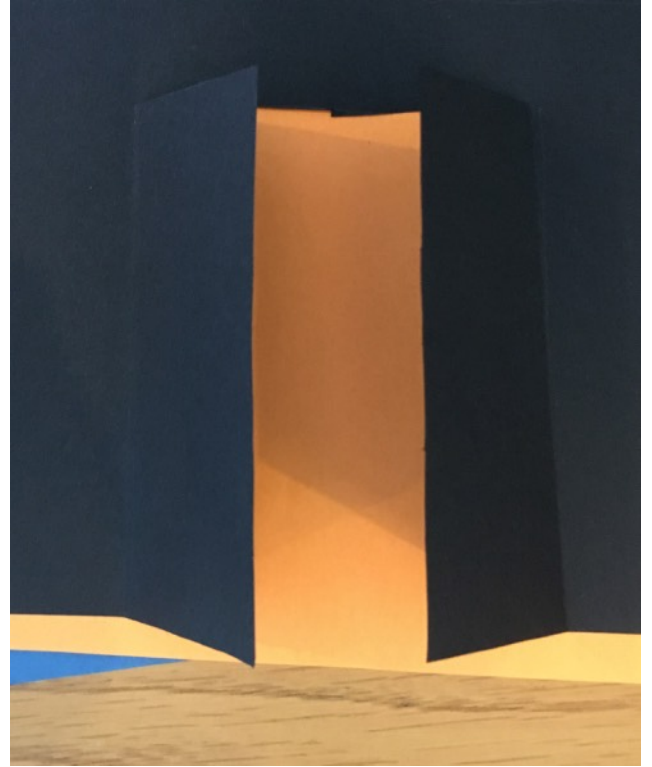

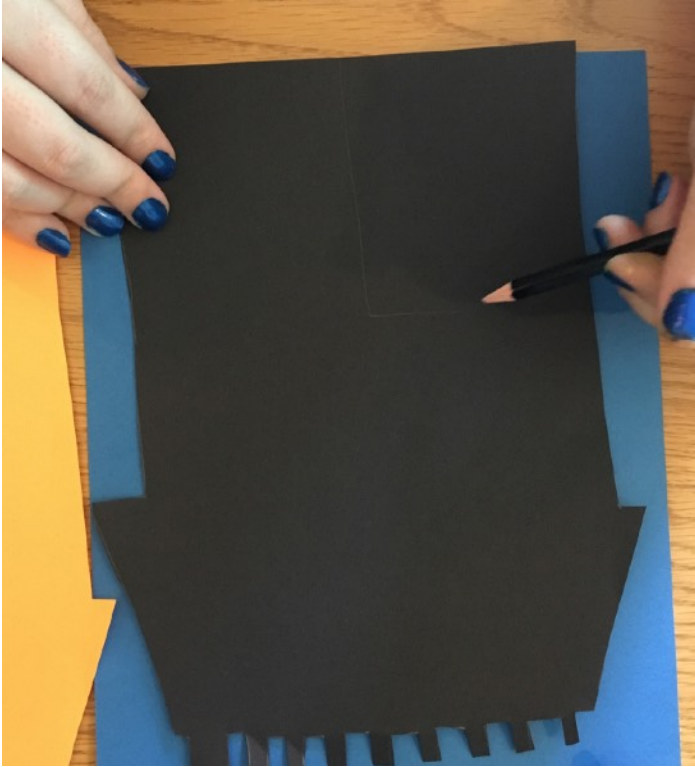

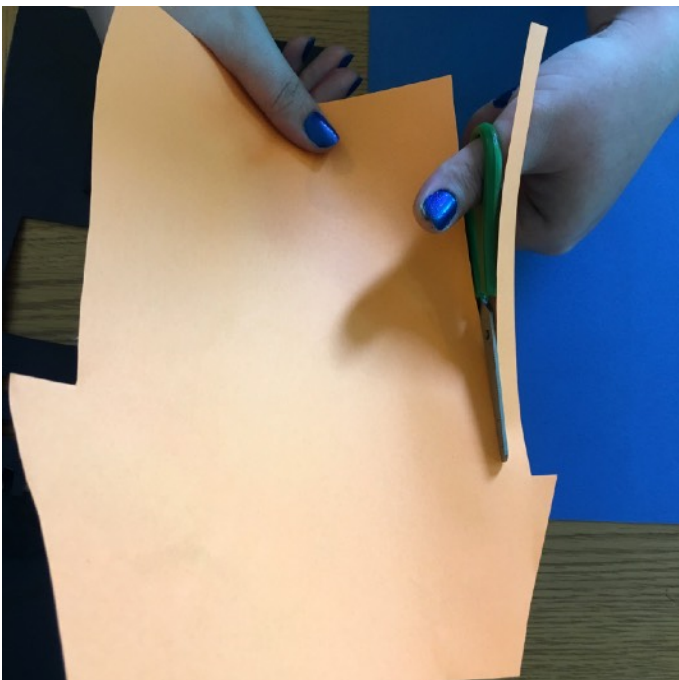

When you are happy with the outline start to cut it out - however to make it easier put the colour you want for the lights in the house underneath the black paper to cut it out at the same time!

Now you have the light layer and top layer cut out take the top layer (black) and start thinking what you want on it such as doors and windows and start drawing them on and cut them out

Take the lighter layer (orange) and trim it slightly all around to be a tiny bit smaller than the black and then glue it on

Then glue both layers to your background like so and then you can start to add in the creepy creatures that inhabit the house and glue them in!

There you have it your own Horrible Haunted House!

Here is another we made to inspire you!
