# Christmas Countdown Tree

Instead of an advent calendar why not decorate your own Christmas tree with numbered decorations day by day so it is in its full glory on Christmas Day!
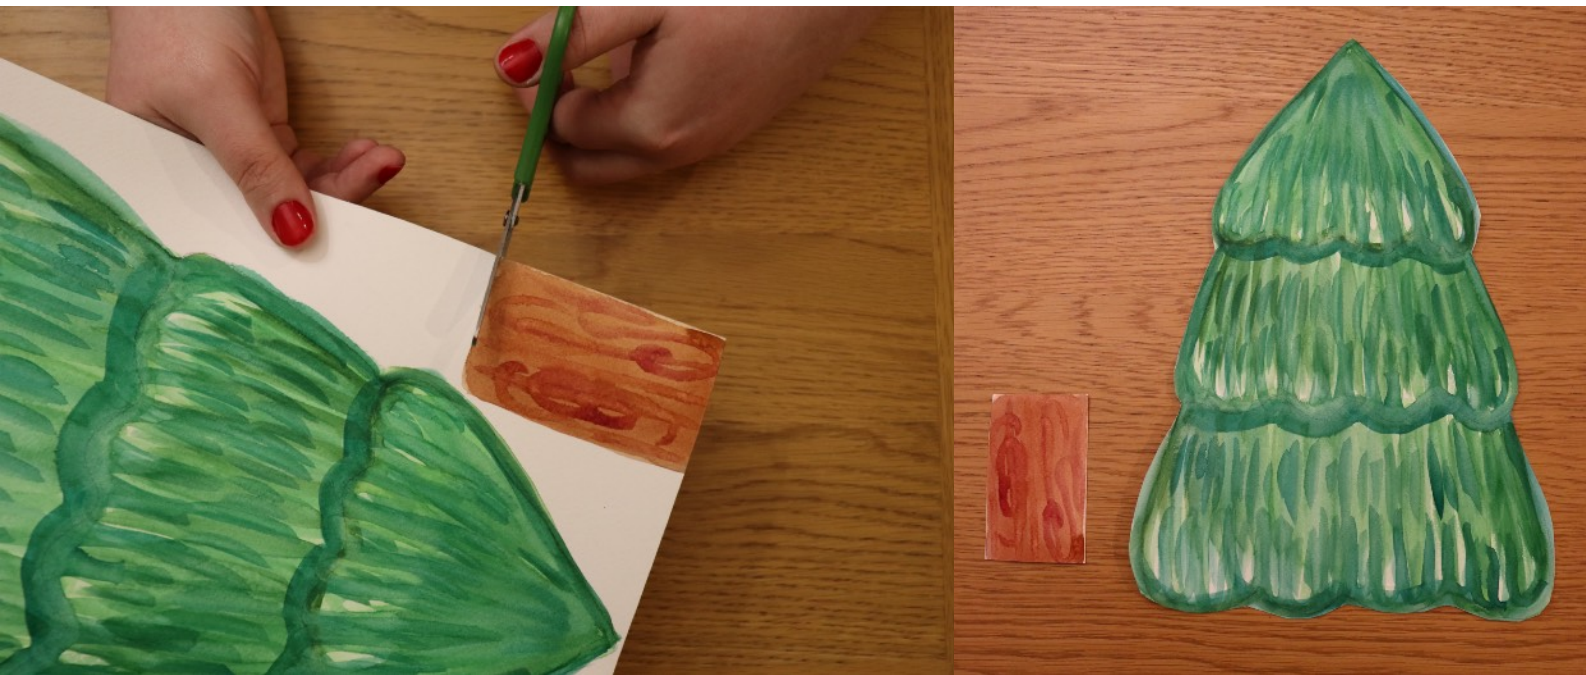

Tools and Materials:

- 2 bits of White Paper
- Pencil
- Gluestick
- Scissors
- Watercolour
- Paintbrush
- Water
- Black Felt Tip

First of all start out by drawing your tree - we drew the body of the tree to fill the page and the trunk separately to make it as tall as possible like so, then you are happy with it you can paint it and let it dry
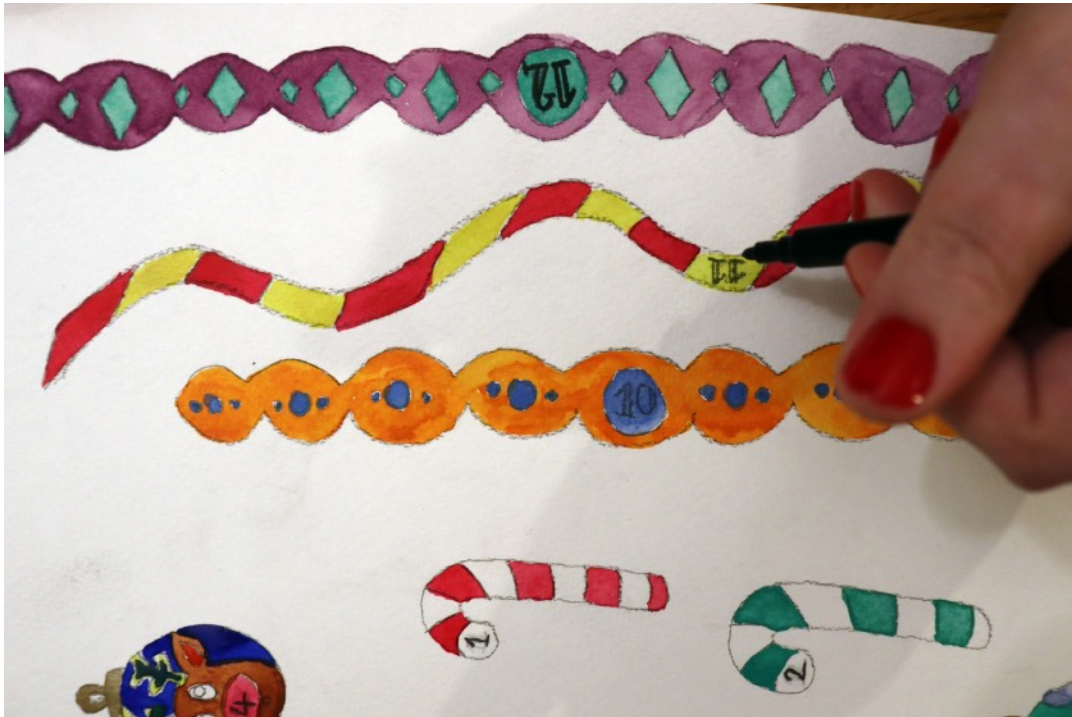

Once it has dried then you can cut it out, and stick the trunk to the body of the tree

Then on your other piece of paper start creating your decorations to paint and cut out we did 13 in total numbering them 12 to 0

Once the decorations are dry you can go over the numbers with the felt tip to make them pop out a bit more

Cut all the decorations out and then day by day on the countdown to Christmas you can start sticking them on!

There you have it your very own
"Christmas Countdown Tree"!
