

## Bear Cards

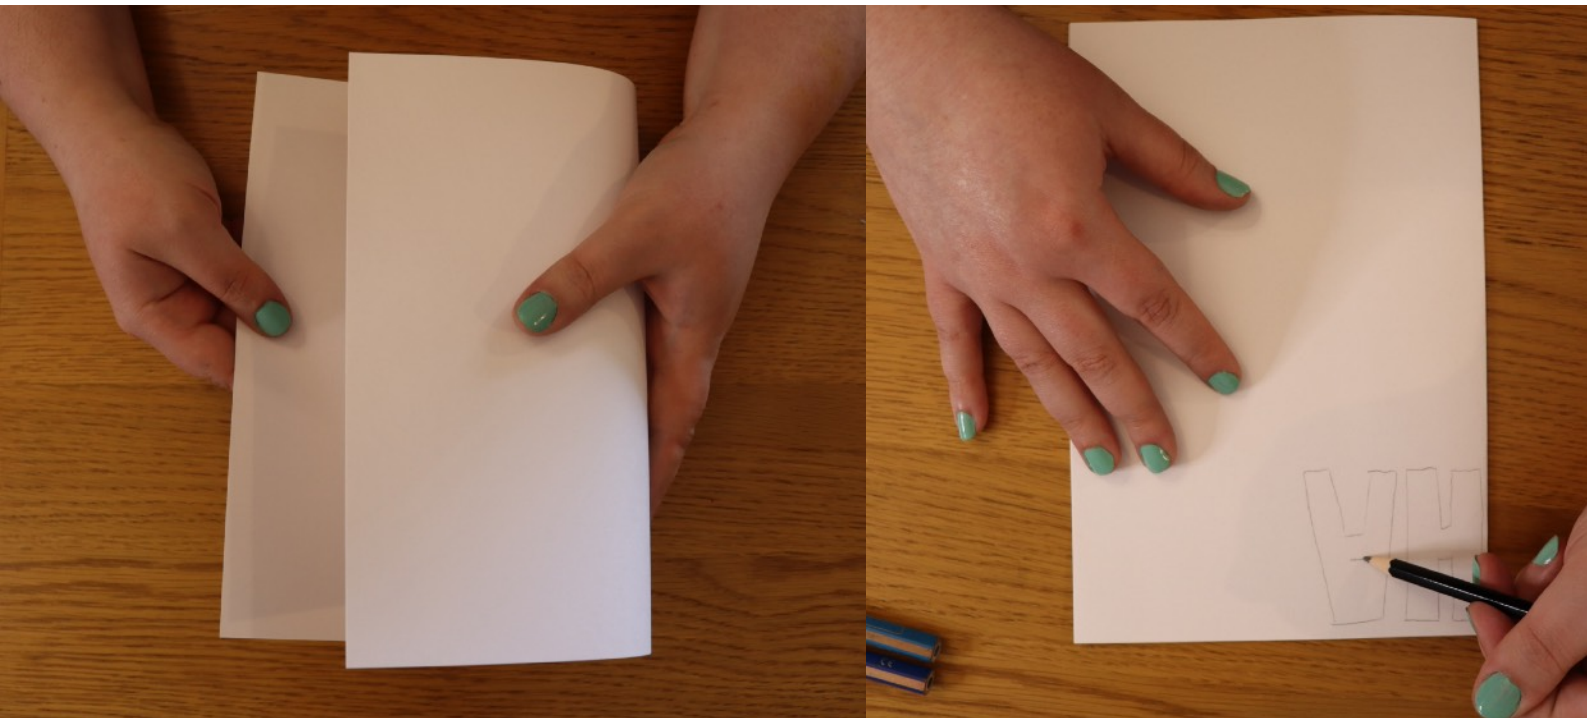

Perfect for Father's or Mother's Day - for all the Papa and Mama Bears out there, why not create this paper craft pop up card, bear hug optional!

Tools and Materials:

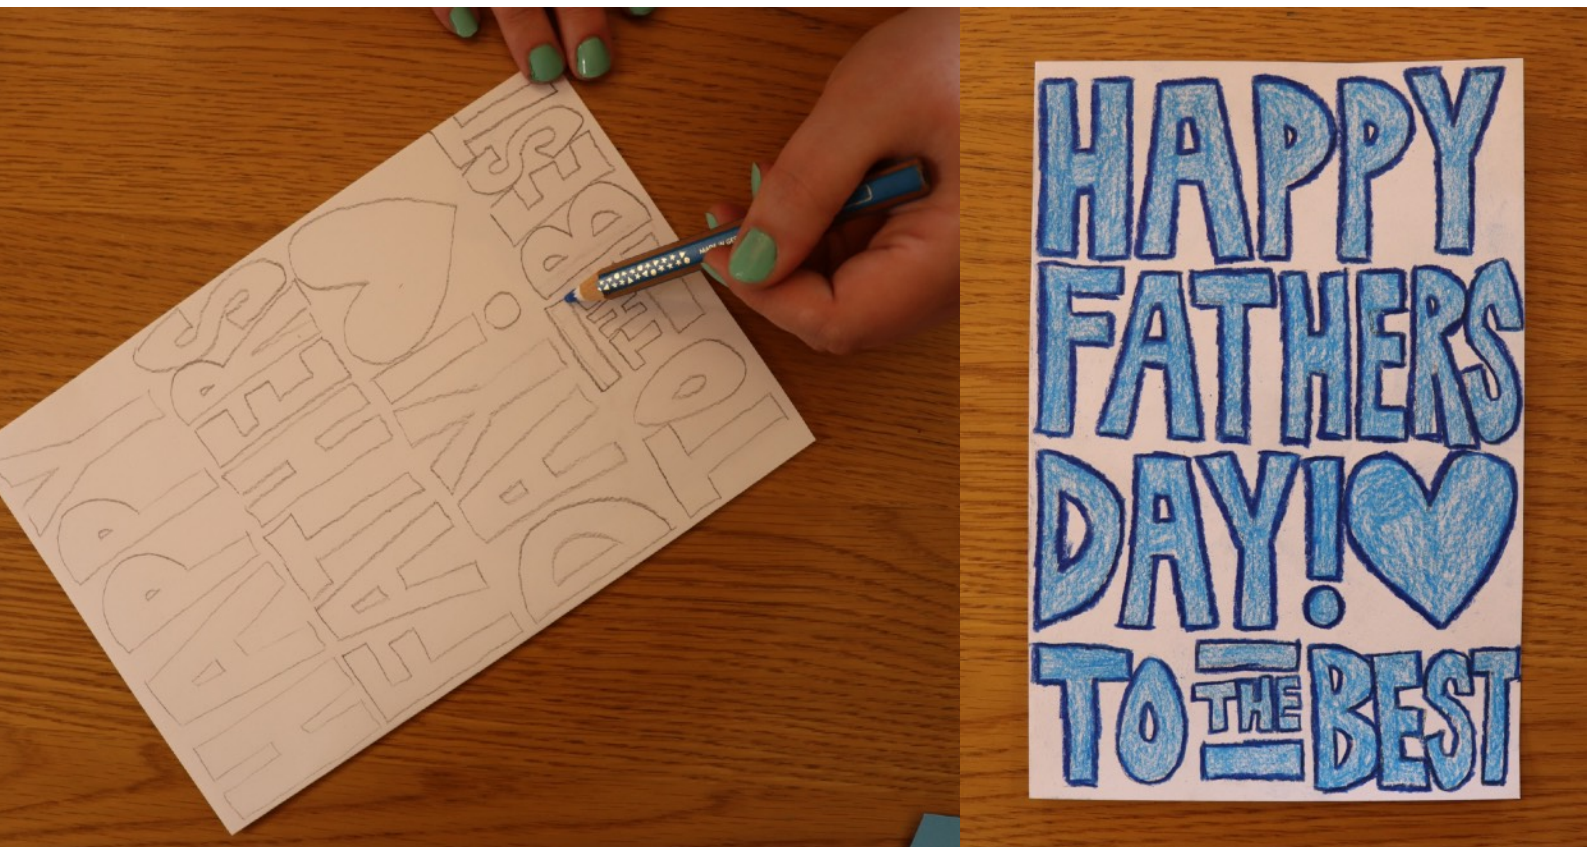

- Coloured Paper, whole and scrap bits
- Pencil
- Gluestick
- Scissors
- White A4 Paper
- Colouring Pencils

First of all get your white paper to make the base of your card, fold it in half like so and then sketch your design for the front of the card - ours is for Father's Day

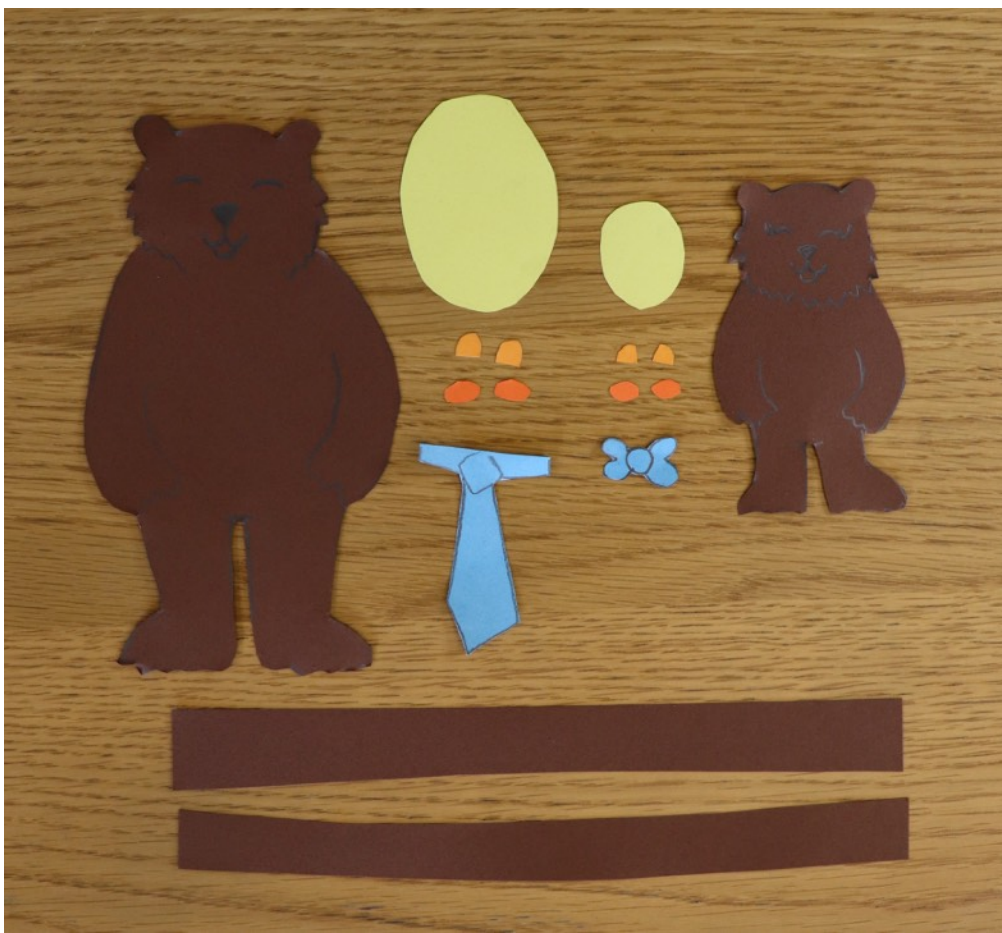

When you are happy with your lettering then you can start to colour it in - we kept text on the front as the bears are inside as a 3Dish element

Now to sketch your bears! We did a papa bear and a smaller girl bear - you can choose how you represent yourself and your dad or whoever you are making the card for, think about accessories so you can capture a likeness, cut all the elements out when you are happy with them plus some strips to make the bears pop out of the card

Glue all the parts of the bear like tummy, ears, accessories etc onto the bear's body, then cut part of the strip to form a circle to put behind the bear on the card like a small spring

Repeat for your other bear like so, make sure you put plenty of glue on so it sticks! Then add your message inside like so

There you have it your very own "Bear Card"!

HAPPY  
FATHERS  
DAY!   
TO THE BEST

Papa Bear
